**THE TENT IS A 36' FOOT DIAMETER INFLATABLE. THE TENT IS A VALUABLE PIECE OF EQUIPMENT FOR A MICRO REALITY RACING FOR A COUPLE OF REASONS.**

**\* FIRST, IT KEEPS YOU THE EQUIPMENT AND YOUR PAYING CUSTOMERS COOL.**

**\* SECOND, IT IS A DRAWING CARD, PEOPLE WANT TO SEE WHAT IS UNDER THE TENT.**

**The scoreboard is actually a crowd keeper, it allows them to keep track of who is winning. The longer they stay the better chance of them to play. Comes with, protecting lid, which folds up for sponsorship placement and roll around stand for easy set up.**

## **FREQUENTLY ASKED QUESTIONS**

**How long does it take to set up the track?**

**Complete set-up of the track usually takes two hours to complete, so please plan to have us arrive three hours prior to the beginning of the event. Track tear-down can usually be accomplished in one hour.**

**How many can play?**

**Micro Reality Track: Approximately 120 -150 racers per hour.**

**These numbers are based on 1 and 1/2 minute races, which we have found to be the optimal race length. However, we can shorten that time if it's necessary to get more people through.**

**Do we need to help you setup the track or run the races?**

**No, we handle all aspects of setting up the track, running the races, and tearing down the track after the event. However, if a tournament is being conducted, it is sometimes easier for the client to have one of their own people keeping track of the racers so that the pit crew can focus on running the races and keeping up with car maintenance.**

**What are the space requirements?**

**Micro Reality Track: 20' x 30' is the required space for our track. The track can be easily carted into most any facility. If it is an outdoor event and we are to provide our inflatable Race Dome, a 38' x 38' space with 18' of height clearance would be required.**

**Is a tent required?**

**If we are not contracted to provide our inflatable Race Dome, the client is responsible to provide covered operating space.**

**Micro Reality Track: The minimum size tent for wet weather operation is 30' x 30'. During dry weather, if the temperature is above 80 degrees, a 20' x 30' tent is required due to the heat of the track and it's effect on the cars.**

**What are the electrical requirements?**

**Inside or outside, one standard 110 volt 20 amp wall plug is all that is needed. we can supply a generator for an additional fee. If we are to provide our inflatable tent, an additional 20 amp circuit would be required.**

**Are there discounts available?**

**Yes. There is special pricing available when contracting us for multiple dates. We also offer discounted rates to charitable organizations. Please contact us for more details.**

**Can we customize the track?**

**Absolutely. Our goal is to be your speedway. We encourage our clients to work with us on decorating the track if advertising/brand awareness is important. Custom car bodies can also be designed to give you further exposure on the track. After the event, the car body is yours to keep. Many clients are thrilled to see a car with their logo and colors out on the racetrack. Please contact us for pricing information.**

**How far in advance do I have to schedule you?**

**There is no specific amount of time that we need, we've been contracted as long as 9 months in advance and as short as 3 days in advance. However the sooner you commit, the less likely it is that we will be hired by another client. If you are interested in having custom car bodies designed for your event, we typically will need anywhere from 2-4 weeks to have them made up, depending on quantity and complexity.**

**How far do you travel?**

**MI, OH, IN, KY, IL**
